

Getting started with ChatGPT plugin for Acelle

Doc version 1.0

1. Overview

Acelle ChatGPT is a plugin for the Acelle Email Marketing Webapp and any other product that inherits from Acelle. The plugin allows users to leverage AI to quickly and efficiently generate content for marketing emails, including email titles, preheaders, and more. It seamlessly integrates with Acelle and brings the writing prowess of ChatGPT to your email content.

2. Installation

2.1. Prerequisites

Before installing, please check and make sure the following dependencies are met:

- Acelle 4.0.25-p211 or higher.
- PHP 8.0 or higher (although Acelle only requires PHP 7.3 or higher).
- PHP PNCTL packages.
- MySQL 5.5 or higher.

1.1. Installation wizard

Acelle ChatGPT is like any standard Acelle plugin which can be installed through the Plugins dashboard of Acelle.

- Step 1. Login to your Acelle admin area, then go to the Plugins dashboard and click “Install plugin” button.

- Step 2. Upload the .zip package of Acelle ChatGPT.

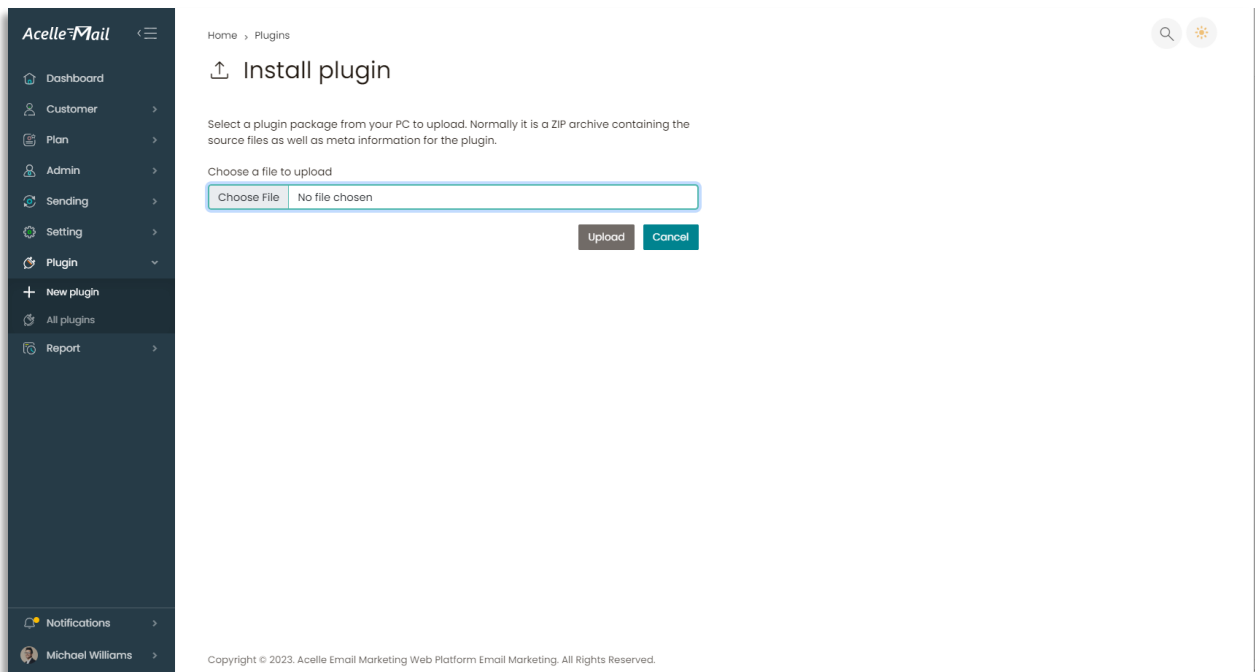

Figure 2. Upload Acelle ChatGPT plugin

- Step 3. Once you have uploaded the plugin, it will be shown up in the list. Then you can click on the Settings button to configure it.

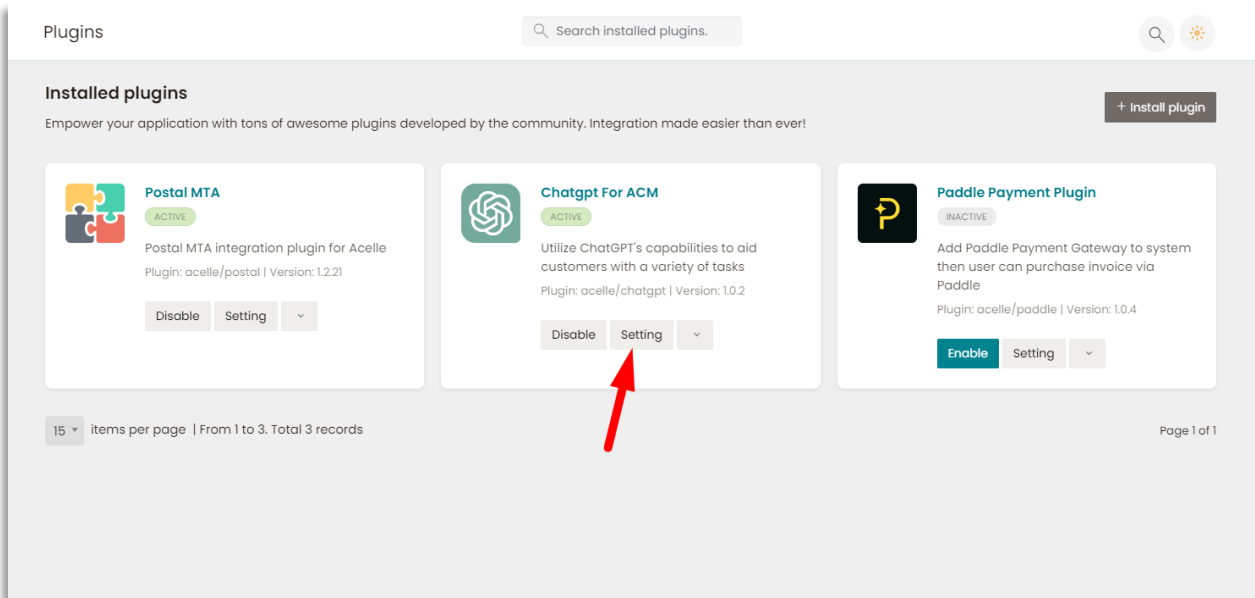

Figure 3. List of plugins

- Enter your Open AI API key to get connected and you're done.

1.2. Manual installation

If you have access to the hosting server's SSH console, you can always install the plugin using easy command lines.

First, extract the plugin to the following folder

```
acellemail/storage/app/plugins/acelle/chatgpt
```

Execute the following command:

```
php artisan plugin:load acelle/chatgpt
```

If you do not see any error reported, then you're done. Login to your admin area's Plugins dashboard to configure it.

3. Use case

Once Acelle ChatGPT plugin is installed and configured correctly, it will automatically add a ChatGPT button to your Acelle input fields. It helps generate appropriate and optimized content for your email headers, preheaders, etc.

Some common use cases

- Check the grammar and spelling for your content.

- Generate alternative versions of your given sentence or phrase: a more formal or informal one for example.
- Ask ChatGPT custom questions in quick and easy popup.

4. Troubleshooting

If you run into any issue during the installation of Acelle ChatGPT, please first check the prerequisites above. Although Acelle only requires PHP 7.3, the plugin requires PHP 8.0 or higher to work properly.

Also, in certain cases, ModSecurity may block certain feature of Acelle ChatGPT, try turning it off if you can install the plugin but its popup keep loading forever.

5. Final words

Acelle ChatGPT is new, and we are working hard on the project to make it better and better every day. If you run into any issue, just shoot us a message and we will be back to you as quickly as we can. Thank you very much.
